- (b) I would get the job,
- (c) If it starts raining,
- (d) If I practice a lot,
- (e) I would help you,

( 5 marks)

## Test 9

**Read the following passage and answer the questions.**

Among the millions of plants available in the world only 600 or so are carnivorous. We call them this because they attract, trap, and eat bugs. Like other plants, they get energy from the sun. But unlike other plants, they get their nutrients from their prey. Carnivorous plants live in bogs and places where the soil lacks nutrients.

Pitcher plant is one among those carnivorous plants. Pitcher plants trick their prey into landing on them. They offer nectar bribes to the foolish insects that would take them. True to their name, pitcher plants have deep chambers. Their landing surface is slippery. They have inward pointing hairs, making it hard to escape. The fly lands on the pitcher plant to eat, but slips into a pit filled with digestive fluids. So what happens to the ill-fated insect?

Much like the animals, the pitcher plant "eats" the poor thing up. How does this seemingly harmless plant do such thing?

The secret lies in the juice. This liquid is no ordinary nectar. It actually contains chemicals (that are similar to those found in the stomach) that could slowly munch and swallow the skin of its prey until it dissolves completely-becoming the very juice that it once tried to drink.

Did you know that the larger pitchers could even trap small frogs, snakes and birds inside? But even though they are deadly traps for insects, please don't believe in science fictions where they could gulp down a person!

1. Why we call some plants as carnivorous ?  
.....
2. Where do carnivorous plants live?  
.....
3. Write two pitcher plants have.
  1. ....
  2. ....

4. Underline the correct sentence.

- a. Carnivorous plants don't get their energy from the sun.
- b. The liquid in the Pitcher Plant contains Chemicals.
- c. The larger Pitcher plants can trap a person also.

5. Find the word from the passage which has the same meaning as the following.

1. silly - .....

2. gulp - .....

( 10 marks)

### Test 10

**Write an essay on one of the following topics. Use about 125 words.**

1. Sports for a healthy life.

- Include
- What is meant by healthy life.
